

# In-semester Project : Certificate Authority – Chain Validation

A CLI based app to validate certificates using CRLs and OCSP.

## CRL Method

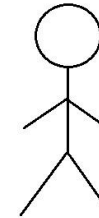

Do any of the my chain's  
certs exist in this list of  
revoked certs?

- Written in C++ using OpenSSL libraries
- Handles both DER and PEM encoded CRL files
- Version controlled
- Build tools used (CMake)
- Unit tested code
- Dual functionality

## OCSP Method

Does the server say that  
any of my chain's certs  
are revoked?
