

In-semester Project : Certificate Authority – Chain Validation

A CLI based app to validate certificates using CRLs and OCSP.

CRL Method

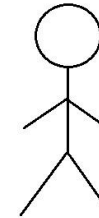

Do any of the my chain's
certs exist in this list of
revoked certs?

- Written in C++ using OpenSSL libraries
- Version controlled
- Build tools used (CMake)
- Unit tested code
- Dual functionality

OCSP Method

Does the server say that
any of my chain's certs
are revoked?
